**PRICES**

We have a simple set price structure so customers know what the cost of the job will be without the need & the hassle of someone having to come out to quote the job. We can keep our prices competitive as all we do is small holes up to 1m diameter. Most other plasterers will generally say they have to come out to see the job and they will usually quote a full days price for a hole.

Our efficient system allows us to have job completed in one visit, job completed in less than two hours, dried & sanded & ready to paint upon us leaving. No more dealing with plasterers leaving you with a piece of sandpaper to sand it yourself when it's dry because they don't want to come back to sand it.

HOLE SIZE	WALLS	CEILINGS (up to 3m high)
between 0-10cm diameter	\$90	\$95
between 10-50cm diameter	\$115	\$125
between 50cm-1m diameter	\$175	\$195
additional holes after first hole	\$55 (each)	\$75 (each)

\* All prices are exclusive of GST

NOTE: If there is more than one hole, the largest hole is always regarded as the first hole

Please note that in the majority of applications the above prices will remain set and no quoting will be required, but there may be some jobs that will require an additional cost such as being held up by other trades on site, framing may be required, ceilings above 3m high or anything else that would require extra time & work. In these situations, jobs will be assessed individually.
